V2B Hosted VoIP Phone System Benefits

V2B allows businesses to maintain their existing PBX features, while offering the ability to access the system from anywhere. **V2B** offers Unlimited extensions, Unlimited voicemails, Robust Auto Attendants, Direct Dial Numbers, and much more. Remote Workers are set up to appear as if they are all in the same location, can 3-4 digit dial extensions, and can access the system anywhere internet is available.

V2B includes a robust suite of web-based tools and features through an easy to use Administrative portal that can be accessed from any internet connection. Administrators can easily add and remove users, configure inbound ring groups, and redirect calls immediately as well as pull detailed usage reports of incoming/outgoing calls by phone number or extension.

V2B systems are managed by a highly trained Customer Service Group that is available 24x7x365. Our engineers provide detailed Site Surveys, LAN cabling, and installation of equipment, including phones, routers and switches. Businesses are able to reduce capital expenditures by consolidating monthly service, equipment and installation costs into one manageable monthly fee.
